

# ABOUT Us

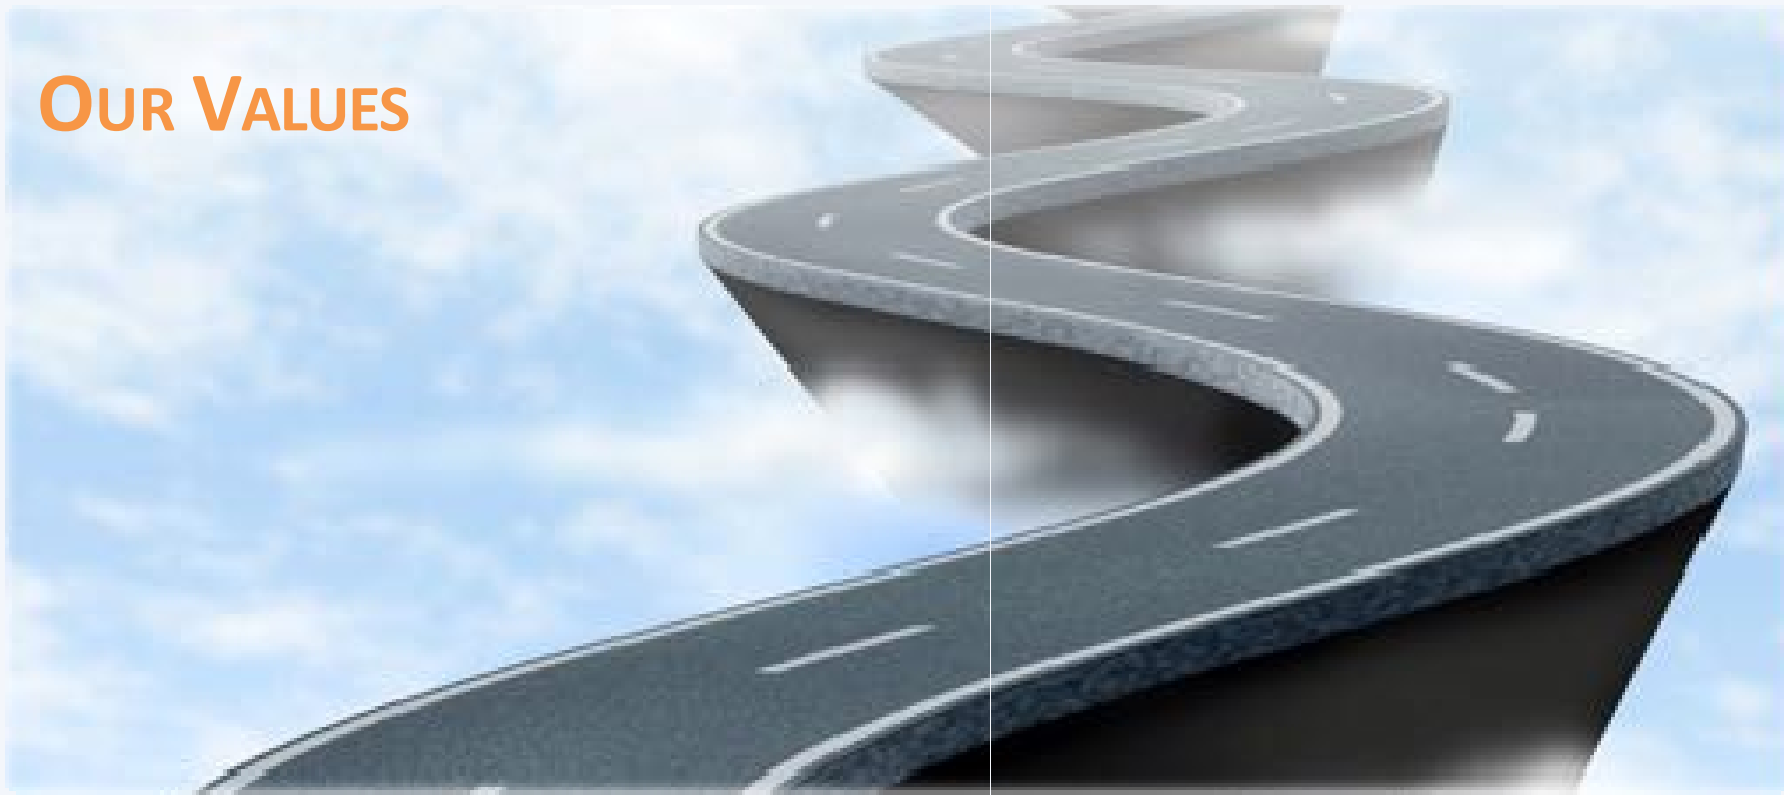

We have been delivering on the promise of business integration to help our customers gain return on investment, foster growth, innovation and value.

“Small enough to be personal, large enough to be reliable”

# OUR VALUES

**Customers:** We will endeavor to meet explicit and latent needs of customers by developing new products supported by strong service. We will build a strong brand for our products through technology, service and our unique approach to engaging with customers.

**Partners:** We will seek to build a long term relationship with our partners and vendors through meeting commitments, ethical and fair dealings.

## CORE VALUES

**Employees:** Employees are our vital assets to meet our vision. We will build a culture of openness and customer centricity. We will constantly invest in enhancing our employees' knowledge base so that they deliver on their performance. We will seek to build an organization of high integrity and discipline.

**Investors:** We will build a profitable product company that adheres to best standards of corporate governance while constantly working towards lower leverage of capital towards debt. The owners will remain committed to the company through a meaningful role that they would play at all times.
